

Personal Page Tim

January 20st, 2013 - 2 hours

Spent a couple hours setting up my development environment with the python libraries we're planning to use (Django, etc).

January 21st, 2013 - 30 minutes

Tasked with investigating embedded video/audio players we could use in the website. [JPlayer](#) might be a good option for us. It's a free audio/video player that appears to have quite a bit of customizability. It will use HTML5 when the browser supports it, but it will fall back to a Flash alternative if it doesn't. So, it should meet all our browser requirements. I haven't tried it yet - that will be the next step. 1h.

January 21st-28th, 2013 ~ 8 hours

This week I accomplished a few different tasks:

1. Started the draft of our requirements document on the wiki. Added the introduction and started to pull out requirements from the design docs.
2. Spent some time researching knockout.js. Completed the tutorials at <http://learn.knockoutjs.com/>.
3. Created a first draft of the "Upload Story" screen. Integrated the view into the TimeMap.

February 1st-3rd, 2013 - 12 hours

Made significant progress in developing the "Upload Story" screen. The user can now use the screen to upload content to the site, including media files like images and pdfs. Spent all day on Saturday at the university working with the group. We also made a lot of progress on our design documentation.

February 4th, 2013 - 1 hour

Spent some time cleaning up the requirements in the design documents.

February 8th, 2013 - 1.5 hours

- Wrote the "Macro-structure" section of the Project Plan.
- Added steps to the TimeMap requirements.

February 9th, 2013 - 5 hours

Helped complete the design documentation and milestone layout.

February 15th, 2013 - 1 hour

Attended meeting with EPL to discuss the project.

February 17th, 2013 - 4 hours

- Looking into validating user input on the Upload Story screen.
- Improving the UI on the Upload Story screen.

February 18th, 2013 - 4 hours

- Fixed a bug Oscar found with uploading media.
- Started work on viewing story content.

February 19th, 2013 - 3 hours

- Update the media file uploading to associate the media to the correct story.
- Working on displaying stories.

February 21th, 2013 - 2 hours

- Displaying text, image, and link based stories.

February 23th, 2013 - 5 hours

- Work on reviewing requirements document
- Viewing audio and video stories with JPlayer

February 26th, 2013 - 2 hours

- Viewing stories based on the URL param
- Started work on the Create Account screen

February 27th, 2013 - 30 minutes

- More work on the Create Account screen

Early March to be filled in when I get my computer repaired (I have notes on that computer)

Early March ~ about 30 hours.

- Unfortunately, my computer was not repaired so I lost my notes on exactly how much time I spent. It was probably around 30 hours, working on various tasks.

March 13th, 2013 - ~7 hours

- Finishing Create Account screen
- Applied styling on my Upload Story, Create Account, View Story screens
- Many small fixes and improvements

March 15th, 2013 - 4 hours

- Created new "My Account" screen to edit account information

March 16th, 2013 - 2 hours

- Investigated a couple bugs (mainly the broken jPlayer!)

March 17th, 2013 - 1 hour

- Set up help page and started filling out the Account help sections

March 18th, 2013 - ~30 minutes

- Worked on Uploading Stories section in the help document.

March 19th, 2013 - 2 hours

- Fixed bug where the Upload Story screen was accessible when the user is not logged in.
- Added Help button to the header.
- Added 'Jump to Branch' to the Branch view.

March 19th, 2013 - 1 hour, 30 minutes

- Worked on adding Facebook comments to the View Story screen.

March 24th, 2013 - 2 hours

- Adding icons to the View Story screen
- Bunch of other small fixes

March 25th, 2013 - 1 hour

- Investigating bug with jPlayer and Chrome (caching problem)
- Updating Create Account screen with new functionality

March 26, 2013 - 2 hours

- Added branch information to the Branch View. Fixed the resizing.

March 29th, 2013 - 8 hours

- Final sprint tasks
- Worked on facebook integration

March 30th, 2013 - 13 hours

- Final sprint tasks
- Cleaned up branch view

April 1st, 2013 - 11 hours

- Final sprint tasks
- Created Quest-set viewer

April 2nd, 2013 - 7 hours

- Final sprint tasks
- Final styling.

Total tracked hours ~143 hours.

My total hours were probably around 150-200 hours.
