

Personal Page Taylor

January 21, 2013

- I'm beginning by getting up to date on Python, and exploring the SirsiSymphony API. I've read a significant portion of the Spec, but real work will need to wait for access.

February 1, 2013

- Waiting on client ID and URL for SirsiSymphony access. In the meantime I've written simple unit tests, and begun fleshing out the Django view to expose EPL login functionality. *I've added requirements related to the 100 Year Quest section.

February 4, 2013

- Currently conversing to provision a virtual development machine for EPL access. Additional work on Django view. Also worked on Planning docs at team meeting saturday.

Feb. 11, 2013

Task	Time
Converted 1913.tif Map to Google mapping tiles	1 hour
Generated GitHub issues for requirements	2 hours
Attended meeting at EPL to discuss technical issues	1 hour

Feb. 18, 2013

Task	Time
Converted 1922.tif Map to Google mapping tiles	1 hour
Created initial hyquest app	3 hours
Refactored common content into centennial	2 hour

Feb. 25, 2013

Task	Time
Created bibliocommons authentication, Facebook authentication	3 hour
Created User APIs	5 hours

Mar. 3, 2013

Task	Time
Created API to allow user information editing	1 hour
Integrated Recaptcha into user account creation	1 hours
Worked on hyquest backend	6 hours

Mar. 10, 2013

Task	Time
Completed hyquest backend, created API	4 hours
Closed a bunch of tickets	3 hours

Mar. 17, 2013

Task	Time
Added ReCaptcha api on backend, in account creation page	3 hours
Added featured quest capability in model	2 hours
Created Security model hiding unknown quests	2 hours
Allowed filtering by superquest model	1 hour

Mar. 24, 2013

Task	Time
Enabled code generation for Code Tasks	6 hours
Added database indexing for HYQuest	2 hours
Refactored hyquest Task lookups to optimize lookups	2 hours
Created form to allow TimeMap task editing	3 hours
Enabled Bibliocommons Tasks	4 hours
Allow User Signups via Bibliocommons login	3 hours
Finished Map Conversion	9 hours

Mar. 31, 2013

Task	Time
Factored out print code page	2 hours
Created Task Completion API endpoints	3 hours
Quest Bugfixes	4 hours
Created Constraints to enforce Quest Action Integrity	3 hours
Refactored Task Verifiers and Admin Forms	2 hours
Added points to user profiles	2 hours
